All Index Interest Accounts have Segments. Segments are credited monthly with the Index Interest Account Guaranteed Interest Rate. The remainder of the interest credited is determined at the end of each Segment Term. For the capped funds, the growth rate is then multiplied by the Segment's Participation Rate and capped at the Segment's Growth Cap. The final interest crediting rate is this calculated amount minus the Index Interest Account Guaranteed Interest Rate. Participation Rates and Growth Caps are determined by the Company, but they cannot be less than the amounts guaranteed in the Policy's contract.
